

How to connect the wire and maintenance for the lighting mirror

WARM TIPS

1.When clear the surface and the edge of the mirror, please use the cotton cloth with water softly.If only to clear the dust of the frame,please don't use the cloth with any liquid things.

2.Majority of the patented clearners are not netural, they could have chemical reaction with the mirror which with silver coating . So such clearners cann't be used to clear the mirror.
